-

PROFESSIONAL EXPERIENCE

Front-end Developer & SEO Specialist, Z Getcare Systems Inc.

Jan 2025 - Present

- Develop responsive, user-friendly frontend layouts and interfaces using Vue.js, React.js, JavaScript, HTML, and CSS, based on provided design mockups and requirements.
- Implement application functionality and perform content/field mapping according to development requirements, ensuring accurate page structure and information presentation.
- Resolve bugs, UI issues, and layout problems while improving website usability, accessibility, responsiveness, and overall user experience.
- Apply frontend development practices that support SEO-friendly and accessible web pages, including proper page structure, semantic markup, responsive layouts, and user-focused interfaces.
- Work with PHP, Java, Vue.js, React.js, and JavaScript in developing and maintaining web applications, with consideration for performance and maintainability.
- Work with MySQL and PostgreSQL databases and SQL scripts/functions to support application functionality and data-driven web content.
- Use Ubuntu as the local development environment for application development, testing, and issue replication.
- Use Git and GitLab for source control, branch management, merge requests, code collaboration, and version tracking.
- Participate in GitLab CI/CD processes supporting automated testing, builds, and deployment workflows.

- Use Jira for task tracking, sprint planning, issue management, and development coordination.
- Use Confluence for technical documentation, knowledge sharing, and team collaboration.
- Collaborate with team members to translate design, content, and technical requirements into optimized, responsive, and user-friendly web experiences.

Programmer, Inari Amertron Inc.

Aug 2023 - Dec 2024

- Developed standalone applications supporting company business transactions.
- Maintained and enhanced existing systems by identifying and resolving software issues and bugs.
- Supported large-scale ERP, MES, and PSIS platforms used within the organization.
- Collaborated with fellow developers to build, maintain, and enhance business applications.
- Applied programming, debugging, database management, and system troubleshooting skills in an enterprise environment.

Full Stack Developer (OJT), 2nd ARCEC Philippine Air Force

March 2023 - June 2023

- Developed the Philippine Air Force Reservist Management System.
- Integrated the system with Infocast to support reservist management processes.
